

# IBM WATSON IoT PLATFORM

TEAM ID	PNT2022TMID08036
PROJECT NAME	SmartFarmer - IoT Enabled Smart Farming Application

The screenshot shows the IBM Watson IoT Platform dashboard. The top navigation bar includes links for 'Browse', 'Action', 'Device Types', and 'Interfaces'. The main heading is 'Browse Devices'. Below this, there are tabs for 'All Devices' and 'Diagnose'. A message states: 'This table shows a summary of all devices that have been added. It can be filtered, organized, and searched on using different criteria. To get started, you can add devices by using the Add Device button, or by using API.' Below the message is a search bar labeled 'Search by Device ID'. To the right of the search bar is a 'Device Simulator' toggle switch, which is currently turned on. Below the search bar is a table with the following columns: 'Device ID', 'Status', 'Device Type', 'Class ID', and 'Date Added'. The table contains two rows of data:

Device ID	Status	Device Type	Class ID	Date Added
12345	Disconnected	NodeMCU	Device	3 Nov 2022 13:31
abcd_1	Disconnected	abcd		

Below the table, there is a notification that says '1 Simulation running'. The bottom of the dashboard shows a search bar with the text 'Type here to search' and a system tray with various icons and the date '18-Nov-22'.
